

MINISTRY OF WORKS AND HOUSING

2018 STATISTICAL REPORT

PRESENTED BY RSIM DIRECTORATE

SEPTEMBER, 2019

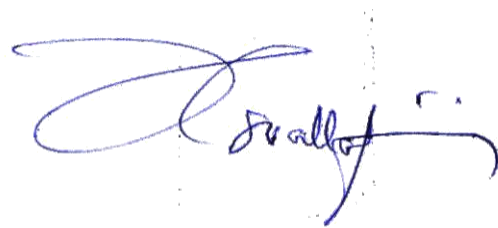

B L A N K P A G E

PREFACE

The generation of the MWH Statistical Report stems from the need for developing modern methods of data storage and reporting for projects and programmes undertaken by the Ministry through its Departments and Agencies for the period 2016 to 2018.

In this regard, the Ministry sought to provide a comprehensive analysis of administrative data produced by its Departments and Agencies while improving upon the sector's data collection, processing/analysis and reporting. This is to provide stakeholders with accurate and reliable data for informed decision making and the opportunity to evaluate the credibility and usefulness of such information for the wider public.

It is the expectation of management that, all Departments, Agencies and Directorates will make use of the Report.

MR. SOLOMON ASOALLA
CHIEF DIRECTOR, MWH

ACKNOWLEDGEMENT

Foremost, the Ministry of Works and Housing (MWH) would like to express its sincere gratitude to the Hon. Minister, Hon. Deputy Ministers, Chief Director, Directors and the Departments and Agencies for their contribution and collaboration towards the generation of the Ministry of Works and Housing 2018 Statistical Report on the projects and programmes undertaken by the Sector.

Our sincere thanks also goes to Mr. George Amoah and Mr. Daniel Asiedu from Ministry of Employment and Labour Relations (MELR) for their invaluable contribution and support to the RSIM Directorate for the development of the 2018 Statistical Report.

Our sincere gratitude goes to Mr. Fred Afful, Ms. Gloria Asante-Antwi and Mr. Enoch Appiah-Kubi 2017/2018 National Service Personnel of the Ministry of Works and Housing for their immense contribution in the generation of the 2018 Statistical Report.

We are also grateful to Emmanuel Kporsu from the Rent Control Department (RCD) for editing the report.

EXECUTIVE SUMMARY

The Ministry of Works and Housing exists to formulate, monitor and evaluate the implementation of policies, plans and programmes for the sustainable management of public landed properties, drainage and coastal protection works, operational hydrology as well as secured, safe, decent and affordable housing for all people living in the country.

In this regard, the Ministry finds it relevant to generate a comprehensive analysis of administrative data produced by its Directorates, Departments and Agencies and improve upon the sector's data collection processes. The Research, Statistics and Information Management (RSIM) Directorate is responsible for the analysis of the administrative data to generate a statistical report for the Ministry. The RSIM Directorate in collaboration with focal persons nominated from the various Departments and Agencies collected, collated and analyzed the data to ensure that accurate and reliable data are presented to Stakeholders.

The data is presented in broad categories which include Building Designs, Structures Constructed with Specified Approved Local Materials, Structures Tested, Geotechnical Investigation Studies, Land Survey Works, Rehabilitation and Refurbishment Works, Rent Cases, Acres of Land Banks Identified and Acquired Nationwide, Affordable Housing Units Constructed, Security Services Housing Units Constructed, Estates Housing Developed, Licensing of Architects, Drains Rechanneled and Housing Loans.

For the full copy of the 2018 Statistical Report, please contact the RSIM Directorate by email;
